Why Edge AI?

Cloud is not fast enough, not private enough, and not always there. eAIgleye brings intelligence directly to the place where it is needed — inside the building, on the site, at the edge — so decisions happen in milliseconds, and nothing sensitive ever has to leave.

01

No Cloud Dependency

Every model runs locally. Zero reliance on remote servers or third-party APIs.

02

Real-Time Intelligence

Detection, classification and alerting the moment an event happens — not seconds later.

03

Privacy First

Video and biometric data remain on-premise. Encryption by default, at rest and in motion.

04

Ultra-Low Latency

Sub-second inference at the source. No round-trip to a datacentre, no throttling.

05

Local Processing

Full pipeline — capture, inference, storage, retrieval — runs on the appliance itself.

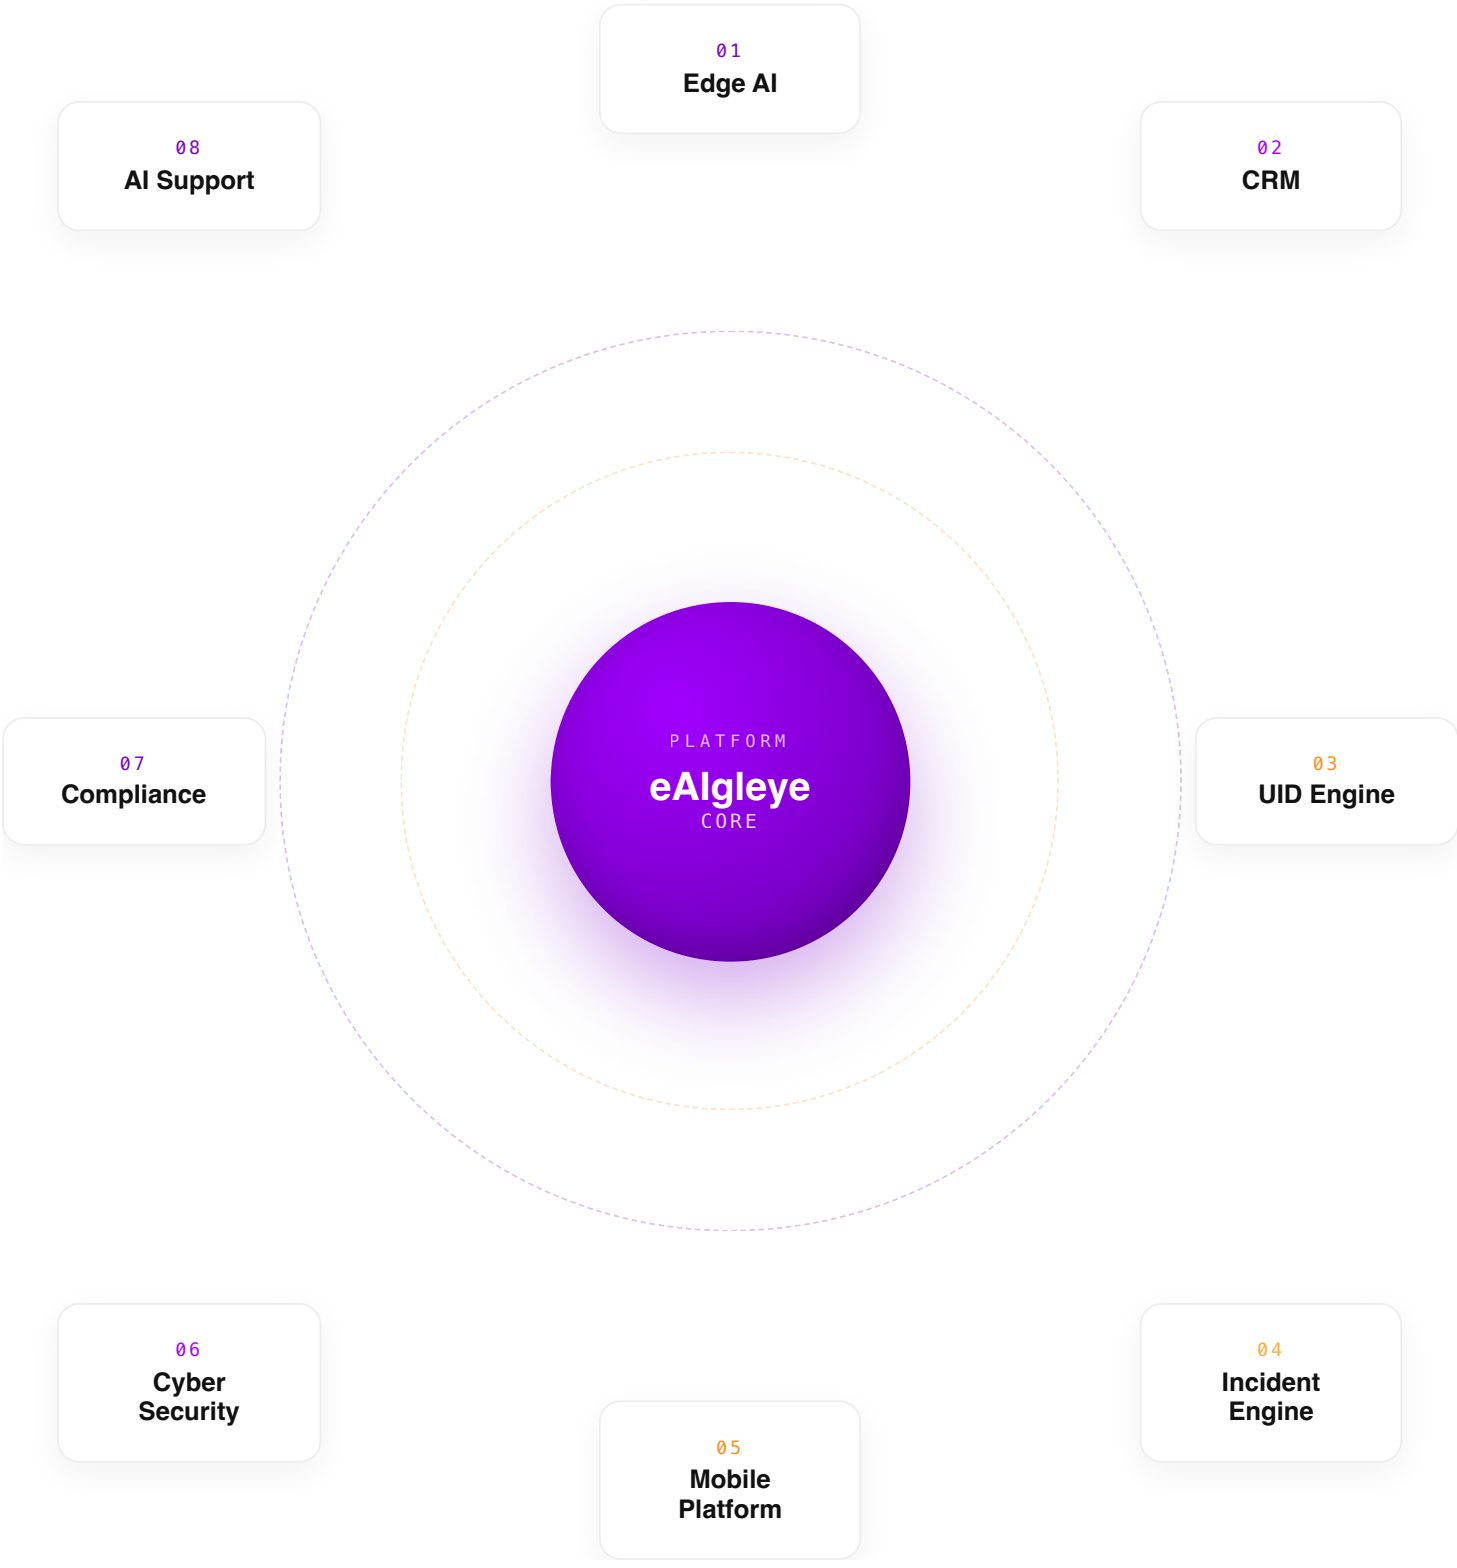
06

Enterprise Security

Signed firmware, hardware root of trust, and role-based access across every layer.

An intelligence stack, not just a device.

Every eAIgleye appliance ships with the full reAInmaker AI platform preloaded — from computer-vision models to CRM, incident workflows and mobile access. One integrated system, delivered ready-to-run.



Four appliances. One platform.

From a single-site pilot to a national deployment — the eAIgleye range scales continuously in compute and camera capacity while running one identical software stack.

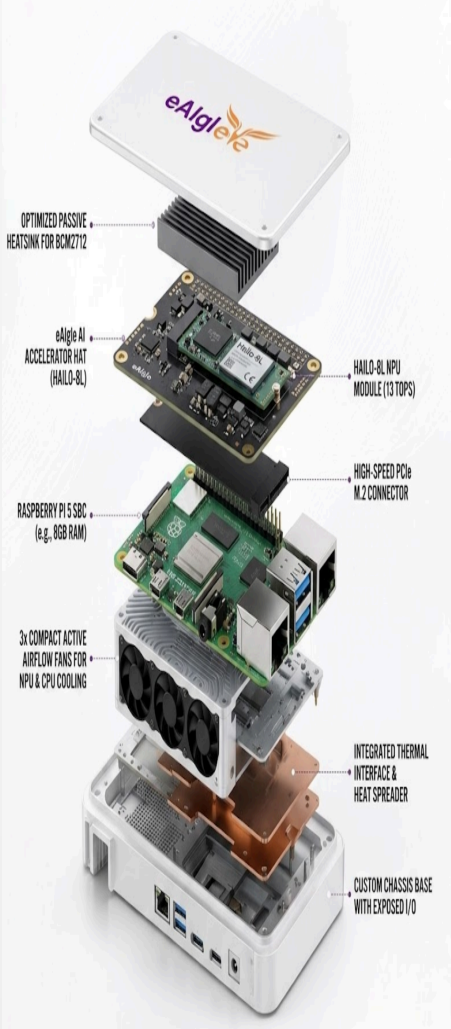
APPLIANCE	POWERED BY	COMPUTE	CAMERAS	PRICE (AUD)
Edge Lite	Raspberry Pi 5 + AI HAT	13 TOPS	Up to 4	**$1,086 AU$**
Edge Pro	NVIDIA Jetson Orin NX 16GB	100 TOPS	Up to 16	**$1,863 AU$**
Edge Enterprise ★ MOST POPULAR	NVIDIA Jetson AGX Orin	**275 TOPS**	Up to 32	**$2,552 AU$**
Edge Ultra	NVIDIA DGX Spark	1,000 TOPS	Unlimited	**$7,696 AU$**

The NVIDIA and Raspberry Pi boards are the compute engines inside each appliance; the eAIgleye product is the complete, deployment-ready system delivered around them.

EAIGLEYE

Edge Lite

The most accessible entry into on-premise AI — a compact appliance built for pilots, small facilities, and first-time deployments.

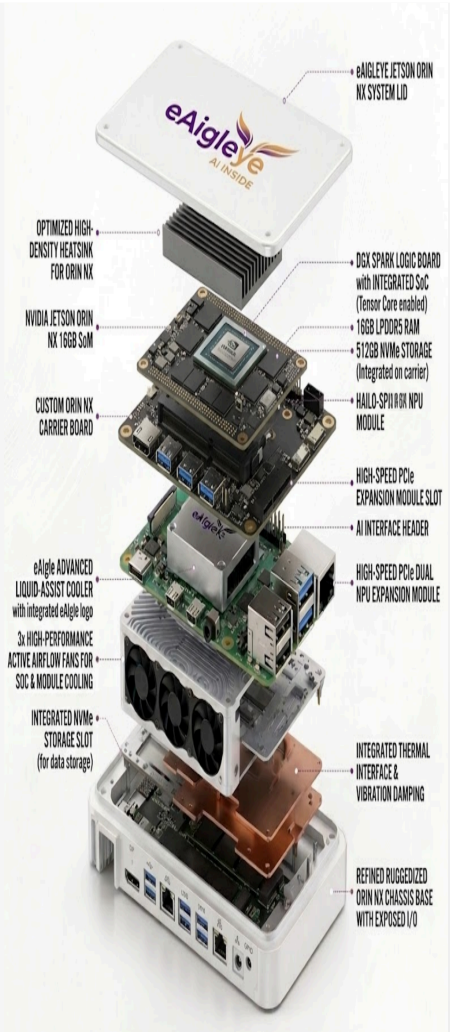


POWERED BY	COMPUTE	CAMERAS	PRICE	BEST FOR

EAIGLEYE

Edge Pro

A 100 TOPS AI engine, 16 concurrent camera streams, and enterprise-grade thermal design in one silent, sealed unit.



POWERED BY	COMPUTE	CAMERAS	PRICE	BEST FOR

Why Edge Enterprise fits most sites.

PERFORMANCE

275 TOPS of dedicated AI

Run detection, classification, tracking and OCR simultaneously across 32 streams without dropping frames.

THERMAL

Sealed, silent, 24×7

Aluminum chassis with active cooling holds sustained performance in commercial ambient temperatures.

DEPLOYMENT

Two-hour installation

Rack, wall, or desk mount. The full eAIgleye platform boots pre-configured from first power-on.

SPECIFICATION SHEET

Edge Enterprise

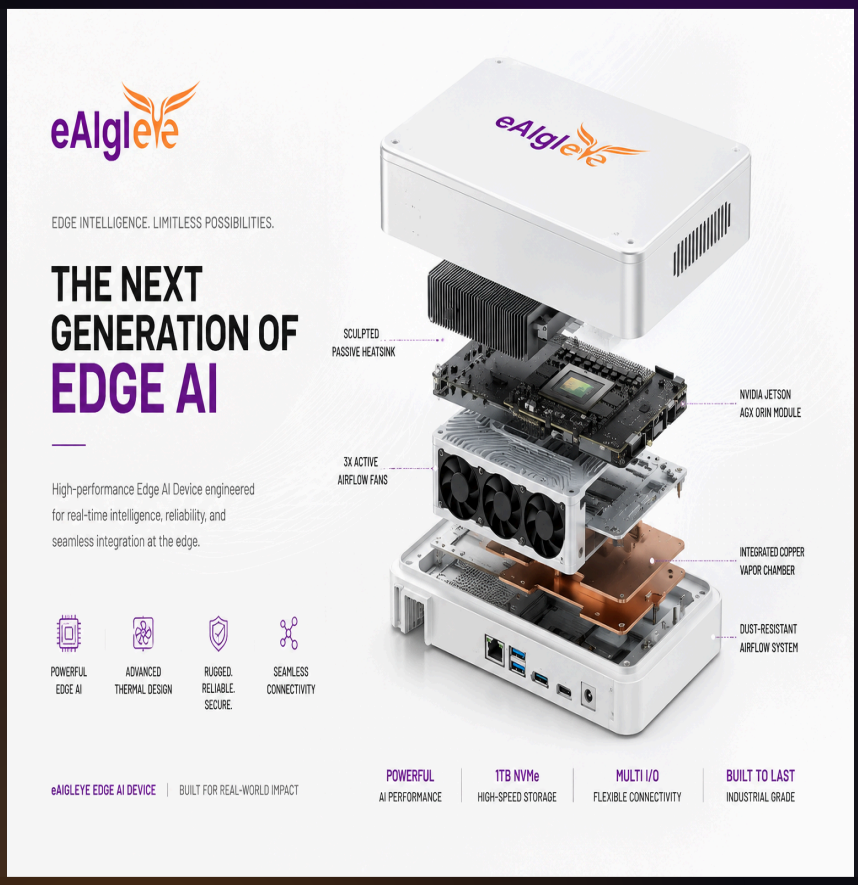
Compute	275 TOPS
GPU	2048-core Ampere
CPU	12-core Arm Cortex
RAM	32 GB LPDDR5
Storage	1 TB+ NVMe
Cameras	Up to 32
Power	120W adapter
Cooling	Active
Networking	10 GbE · Wi-Fi 6
Warranty	3 years

★ MOST POPULAR & RECOMMENDED

EAIGLEYE

Edge Enterprise

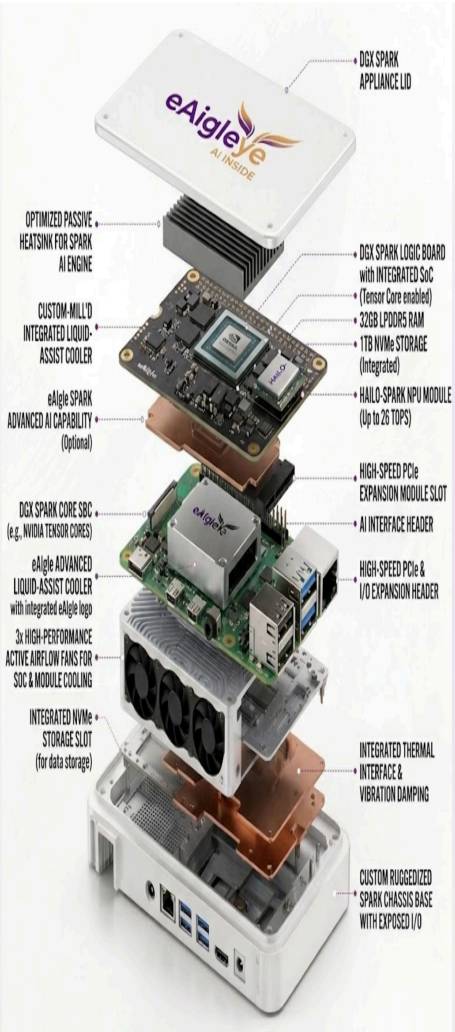
Campus-scale AI in a single appliance. 275 TOPS of compute drives 32 concurrent streams across large sites — hospitals, universities, government facilities.



EAIGLEYE

Edge Ultra

One petaop of AI at the edge. Built for national infrastructure, AI datacentres, and smart-city deployments where compute has no ceiling.



POWERED BY	COMPUTE	CAMERAS	PRICE	BEST FOR

Delivered as a complete appliance.

Every eAIgleye Edge Device ships as a deployment-ready system — chassis, storage, power, and thermal design integrated as one product.

01 Premium CNC Aluminum Enclosure

- Precision CNC-machined chassis
- Industrial-grade construction
- Passive or active thermal cooling
- Airflow optimised for 24×7 operation

02 High-Speed Storage

- 1 TB NVMe SSD (pre-installed)
- High-performance local model storage
- Incident database on-device
- Video metadata & logs

03 Industrial Power Supply

- 90W industrial power adapter
- Universal AC input (100–240V)
- Regional power cord included
- Continuous operation on site power (no UPS)

04 Dust-Resistant Design

- Integrated dust-resistant ventilation
- Filtered airflow system
- Low-maintenance thermal management
- Long-term commercial deployment

The premium hardware envelope — one line item.

The following premium components are recommended as a single bundled configuration for every eAIgleye Edge Device. Included as standard on every appliance in the portfolio.

INCLUDED COMPONENTS

Premium CNC Aluminum Enclosure
Passive / active cooling per model — 01

1 TB NVMe SSD
Pre-installed, factory-imaged — 02

90W Industrial Power Adapter
Universal AC · regional cord — 03

Dust-Resistant Airflow System
Filtered, low-maintenance — 04

BUNDLED COST

Recommended additional hardware, per appliance.

Approximately

$340 AU$

Per eAIgleye appliance, included as standard.

Pricing indicative in Australian Dollars (AUD), subject to region and volume. UPS not included — appliances are designed for continuous operation on client's existing power infrastructure.

Engineering, at a glance.

COMPUTE

13 → 1,000 TOPS across the portfolio, matched to camera count and workload.

MEMORY

8–64 GB unified LPDDR5. Zero-copy pipelines between CPU and AI accelerator.

STORAGE

1 TB NVMe standard. Optional 2 TB / 4 TB expansion for long retention windows.

POWER

15W idle to 90W peak. Universal 100–240V industrial adapter, regional cord included.

CAMERA CAPACITY

4 to unlimited streams. RTSP, ONVIF, and reAInmaker native protocol supported.

OPERATING TEMP

0°C to 45°C ambient. Extended range models available on request.

COOLING

Passive on Lite. Active with dust filter on Pro/Enterprise/Ultra.

NETWORKING

Gigabit / 2.5 GbE, Wi-Fi 6, optional 10 GbE and 4G/5G LTE modules.

DEPLOYMENT

Desk, wall, VESA and 1U rack mount. Pre-configured, plug-and-run.

WARRANTY

3-year standard hardware warranty. Extended plans available.

SUPPORT

24×7 technical, remote diagnostics, OTA firmware and AI model updates.

EXPANDABLE

Storage, network, and compute modules field-upgradable on Enterprise and Ultra.

Side by side.

SPEC	LITE	PRO	ENTERPRISE ★	ULTRA

Smart Cities

Consultation to go-live, on one timeline.

01	**Consultation**	Discovery call. Understanding site, cameras, incident types, compliance envelope.
02	**Site Survey**	On-site or remote audit — camera positions, network topology, power planning.
03	**Installation**	Rack, wall, or desk mount. Cameras linked, power connected, boot to platform.
04	**AI Configuration**	Models selected per use case. Detection zones, alert routing, user roles.
05	**Environment Training**	Models tuned to site-specific lighting, angles, and behaviour patterns.
06	**Testing**	End-to-end verification against your acceptance criteria and incident library.
07	**Go Live**	Handover to operations. 24×7 support and continuous OTA model improvements.

A service commitment behind every appliance.

ALWAYS-ON

24×7 Technical Support

Reach a real engineer at any hour, in any timezone. Escalations tracked to resolution.

ZERO-TOUCH

Remote Diagnostics

Health telemetry, log capture, and issue reproduction — without a site visit.

CONTINUOUS

OTA Software Updates

Signed firmware and platform updates delivered over the air, without downtime.

IMPROVING

AI Model Updates

New detection classes and accuracy improvements pushed to every appliance.

NAMED

Dedicated Engineer

Enterprise accounts get a named technical contact who knows your deployment.

ANNUAL

Maintenance Programs

On-site health checks, filter replacements, and hardware refresh planning.

See it running on your site.

Book a live demonstration with the reAInmaker AI team. Bring your camera streams — we will show inference happening on the appliance in real time.

THE COMPANY BEHIND

eAIgleye

reAInmaker AI builds edge-first intelligence systems for the environments where safety and privacy are non-negotiable. Our platform runs entirely on-premise — from the models to the storage to the mobile experience — so decisions are fast, data stays local, and operators stay in control.
